Special Values

We have many fine hybrid crosses with only a small quantity of plants available, too few to put on a listing. Hence, we are offering the following assortments at prices which represent a saving over the regular price.

Fine Hybrid Blooming Size Plants

1 plant \$7.50 Two \$13.50 Three \$18.00 Four \$22.00 Five \$25.00

May be Cattleyas, Cymbidiums, Miltonias, Odontoglossums or Cypripediums, all of one genera or any combination of the above genera that you desire.

Fine Hybrid Seedlings

Five small seedlings of the above genera, with the exception of Cypripediums, are offered at \$10.00. These also may be all of one genera or assorted, whichever you prefer.

We carefully select these plants and they will all be labeled as to name or cross.

Experiments in Genetics

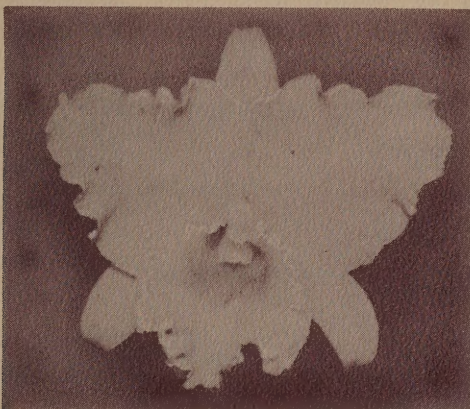

Now in Progress

- No. 1 LH94 C Nellie Roberts 'Tyoh' x self.....\$2.00 ea.; 6 for \$9.00; 12 for \$15.00**
(C Bow Bells x Dowiana Aurea 'Sheppeys')
Expect purples, whites, whites with colored lip, yellows.
Fine Bow Bells qualities should predominate.
- No. 2 LH75 Pot. Tripoli 'Tyoh' AM-AOS x self.....\$3.00 ea.; 3 for \$6.00; 6 for \$10.00**
(BLC Ishbel x SLC Ramona)
Fine salmon-red flower, blooms more than once a year, very vigorous.
- No. 3 LH139 C Bow Bells 'Snowy River' AM-AOS x
C Nellie Roberts 'Tyoh'.....\$2.00 ea.; 6 for \$9.00; 12 for \$15.00**
The finest Bow Bells we have seen, with our best Nellie Roberts.

We are inviting those interested to join us in the above experiments. Several hundred people are now taking part and we are going to compile and publish the results as they become available. The purpose is to further the knowledge of the laws of inheritance in Orchids. Upon receipt of your order for the seedlings that you desire, we will send you additional information as to what we would like you to report to us as the seedlings eventually bloom. We have replanted these crosses several times by now, using seed from the original pods which we have stored in our seed bank. The seedlings are shipped bare-root ready for individual pots.

AND NOW ANNOUNCING OUR NEWEST EXPERIMENT

(and perhaps the most interesting one)

Rosemary Upton

- No. 4 LH52 LC Rosemary Upton x self.....6 for \$7.50; 12 for \$12.00**
(C Bow Bells x L. Pumila alba)
Expect whites and purples with large and small growth habits. L Pumila is a miniature.

We will start taking reservations from those interested in joining in this experiment. The seedlings will not be ready to ship until late spring of 1962 and the orders will be shipped post paid in the order received.

The original Black & Flory Ltd. cross of Rosemary Upton produced good round shaped mauve flowers of good size. We selfed one of the best of these sometime ago and bloomed the first, the picture of which is shown above. It turned out to be a fine white with Bow Bells shape and $4\frac{1}{2}$ " across the petals. It was our belief that if this cross was selfed the seedlings would be widely different in type. This would make it easier to recognize and classify the various combinations of the chromosomes between the two separate genera which would result in our obtaining more worthwhile information. There should be dwarf plants with large flowers, large plants with small flowers and all the variations in between. Some of the blooms should be white and some mauve. It so happened that the first and only one to bloom so far is a very fine white intermediate between the two. Upon seeing this flower, we replanted the seed from this same original pod, and upon obtaining excellent germination, determined to use this for our Experiment No. 4 since it appears to have such ideal qualifications for this type of project.

Awarded and Exhibition Type Orchids

Write for our most recent list of our fine Exhibition and Stud plants. This list is continually changing as divisions become available and as others are sold. We have also just released a new listing covering our transplanted BLUE RIBBON ORCHID FLASKS and a new list of ORCHID SEEDS which are available in our seed bank.

We have new lists on these categories about every three months and will be glad to put you on our mailing list to receive these special listings if you will indicate that you would like to receive them.

Due to the enthusiastic acceptance in our last listing of our first

"Cream of the Crop" Seedlings

We are again offering this category.

LH131 LC Bonanza 'Mildred Wagner' AM AOS x LC Seattle 'Dolores' HCC-ODC.....\$ 5.00
Two of the finest purples and you should see their vigor.

LH153 Pot. Tripoli 'Tyoh' AM AOS x SLC Anzac 'Orchidhurst' FCC RHS..... 7.50
Cannot imagine a better combination for reds.

These are community pot size seedlings ready for individual pots, but only a very small percentage of seedlings from any cross will qualify for this category, "Cream of the Crop," since only the huskiest most vigorous and largest seedlings fall in this classification. Therefore, the supply available is extremely limited. These two crosses are also on this listing under "Bare-Root Community Pot Seedlings" and are supplied at the normal sizes at a lower price. For those who would rather pay more and get the very best.
